

1. TGE Management System

Executive Summary

This document presents the proposed **The Green Entrepreneur (TGE) Management System**, which is designed to support the organisation's daily operations and improve the delivery of its programmes and services.

The system will provide a modern web platform consisting of a **public website** and a **secure member portal**. It will enable TGE to manage members, programmes, cohorts, mentors, events, learning resources, organisational documents, announcements, and website content through a centralised administration portal.

Members will be able to securely log in to access their personalised dashboard, view their enrolled programmes, download learning materials and organisational documents, register for events, receive announcements, and participate in mentorship activities.

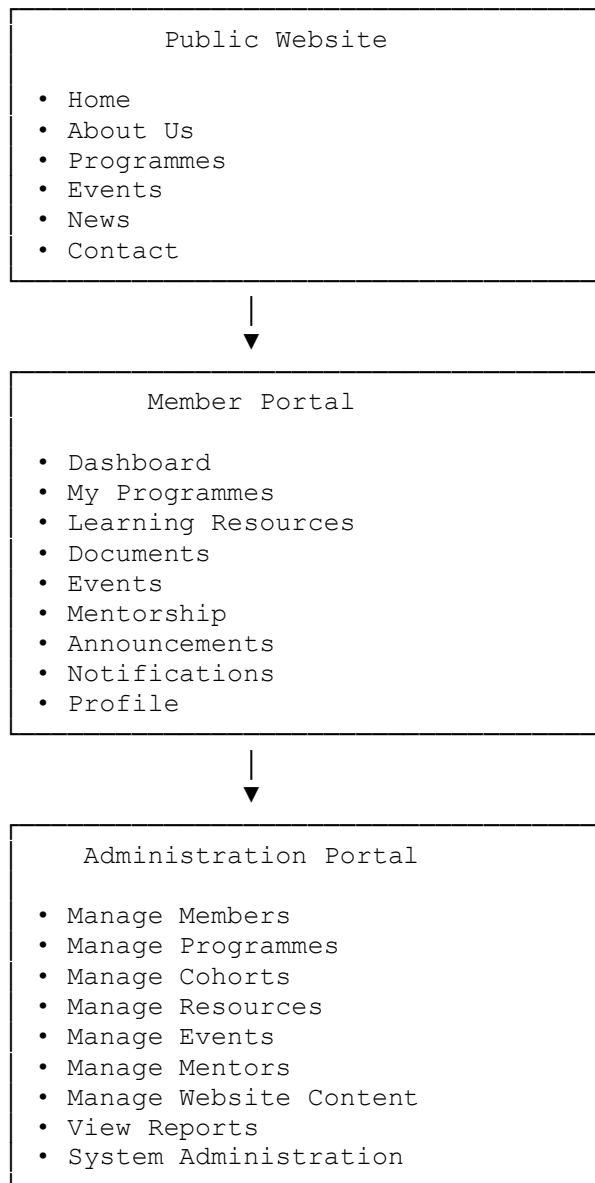

The purpose of this document is to present the proposed functionality of the system before development begins. Your review and feedback will help ensure that the final system aligns with the operational needs and strategic objectives of The Green Entrepreneur.

2. System Overview

Proposed System Structure

The proposed TGE Management System consists of three main sections that work together to support both the organisation and its members.

TGE Management System

Overview

The proposed system will provide:

- A **Public Website** where visitors can learn about The Green Entrepreneur, explore programmes, read news, and view upcoming events.
- A **Member Portal** where registered members can securely log in to access their programmes, learning resources, organisational documents, announcements, events, mentorship information, and personal dashboard.

- An **Administration Portal** where authorised staff can manage members, programmes, resources, events, mentors, website content, reports, and other organisational activities through a single integrated platform.

3. System Modules

Proposed System Modules

The proposed TGE Management System will consist of the following core modules.

Module	Purpose
Authentication & Authorization	Provides secure login, logout, password management, and role-based access control for all authorised users.
Member Management	Manages member registration, profiles, account status, and personalised dashboards.
Programme & Cohort Management	Enables the creation and management of programmes, cohorts, and member enrolments.
Document & Resource Management	Allows administrators to upload and organise learning materials and organisational documents while enabling members to securely access and download them.
Event Management	Supports the planning, publication, registration, and management of organisational events, workshops, webinars, and competitions.
Mentorship Management	Manages mentor profiles, mentor assignments, mentoring sessions, and member progress.
Communication & Announcements	Enables administrators to publish announcements, send notifications, and communicate important information to members.
Website Content Management	Allows administrators to update website pages, news articles, programme information, and other public content without technical assistance.

Module	Purpose
Reporting & Analytics	Generates reports and dashboards that support organisational monitoring and informed decision-making.
System Administration	Manages users, roles, system settings, security, audit logs, and overall system maintenance.

Benefits to The Green Entrepreneur

The proposed modules will enable The Green Entrepreneur to:

- Centralise organisational information in one secure platform.
- Improve communication with members.
- Simplify programme and cohort management.
- Provide members with easy access to learning resources and important documents.
- Reduce manual administrative work.
- Support organisational growth through efficient digital processes.

4. User Roles and Responsibilities

System Users

The proposed TGE Management System will support different categories of users. Each user will have access only to the features required for their role.

User Role	Main Responsibilities
Visitor	View the public website, learn about TGE, explore programmes, read news, view upcoming events, and contact the organisation.
Member	Log in to the member portal, manage their profile, view enrolled programmes, access learning resources and organisational documents, register for events,

User Role	Main Responsibilities
	receive announcements and notifications, and participate in mentorship activities.
Mentor	View assigned members, schedule mentoring sessions, record mentoring notes, monitor member progress, and support entrepreneurs throughout the mentorship programme.
Organisation Administrator	Manage members, programmes, cohorts, learning resources, events, mentors, announcements, website content, and organisational reports.
System Administrator	Manage user accounts, roles, permissions, system settings, security, audit logs, backups, and overall system maintenance.

Access Control

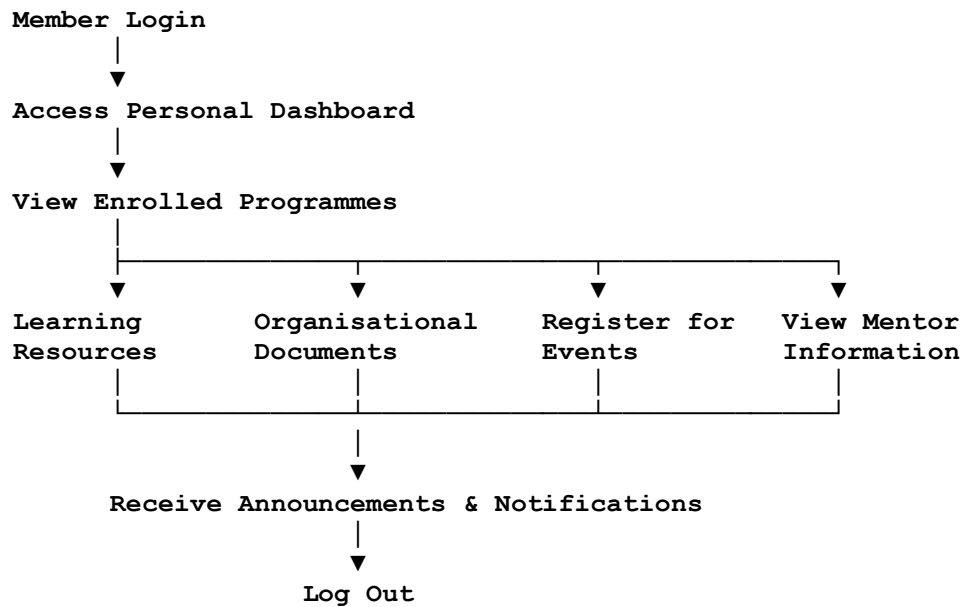

To ensure the security of organisational information, the system will implement **role-based access control**. Each user will only have access to the features and information required to perform their responsibilities.

This approach protects sensitive information while ensuring that users have a simple and personalised experience based on their role within the organisation.

5. How the System Will Be Used

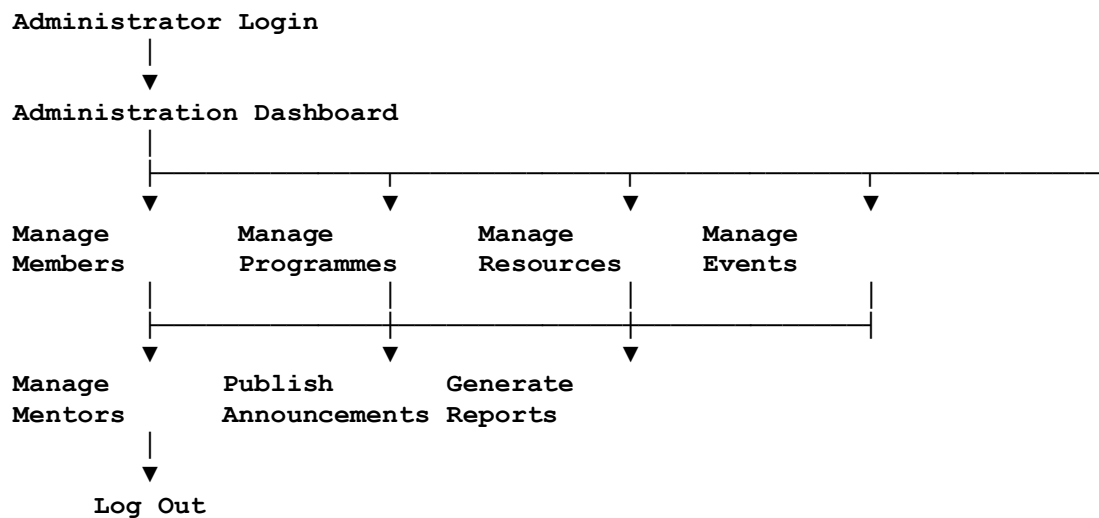

Member Journey

The following illustrates the typical journey of a member within the proposed TGE Management System.

Administrator Journey

The following illustrates how administrators will manage the organisation through the system.

Expected Benefits

The proposed system will:

- Centralise organisational operations into a single platform.
- Improve communication between TGE and its members.
- Simplify programme and cohort administration.
- Provide members with easy access to training materials and organisational documents.

- Improve monitoring of programmes, mentoring activities, and events.
- Reduce manual administrative work and improve operational efficiency.

6. Review, Feedback and Approval

Review and Feedback

This document presents my current understanding of the proposed **The Green Entrepreneur (TGE) Management System** based on the Strategic Plan (2026–2028) and our discussions.

Before development begins, I kindly request that you review the proposed functionality to ensure it accurately reflects your expectations and the operational needs of The Green Entrepreneur.

Please indicate your feedback below.

Review Checklist

- ☐ The proposed system meets the organisation's current needs.
- ☐ The proposed modules accurately reflect how TGE operates.
- ☐ Additional features should be included.
- ☐ Some existing features should be removed.
- ☐ Some existing features should be modified.

Additional Comments

Please use the space below to provide any suggestions, corrections, or additional requirements.

Next Steps

Following your review and approval:

1. Any requested changes will be incorporated into the system design.
2. The final system specification will be updated.
3. Development of the TGE Management System will begin.
4. Regular progress updates and demonstrations will be provided throughout the development process.
